

## Consultancy, Procurement, Logistics - our Strengths

Since 1968 the name BEGECA has stood for professionalism and experience in planning, consultancy, procurement and logistics services for projects in countries of the South and the East. Every year, over 300 organisations avail themselves of our services for some 1,000 projects.

The focus of our activities ranges from technical, conceptual and commercial consultancy during the planning phase, through to the procurement of all the necessary goods, to logistical management, and to installation and start-up in situ, including the later supply of spare parts and consumable supplies.

<p><b>Emergency Supplies</b> When emergencies occur, humanitarian assistance needs to be provided quickly. BEGECA has direct access to emergency stock, ready to be shipped immediately by air freight. The articles meet the quality standards for humanitarian assistance (Sphere).</p>	<p><b>Medicinal Supplies</b> BEGECA can supply well over 40,000 medical articles from stock that meet high international quality standards.  When it comes to equipping health care units BEGECA can supply new products adapted to the local market as well as reconditioned installation equipment.</p>
<p><b>Vehicles and Technical Equipment</b> BEGECA procures more than 400 vehicles every year which possess an official manufacturer's warranty. The range of technical products is wide, covering e.g. agricultural implements, the equipment of technical schools as well as communication and office equipment.</p>	<p><b>De-centralised energy supply</b> BEGECA has been fully engaged for quite some time in developing sustainable solutions that are designed to meet the needs of our partners. This is why we always begin our advice by carrying out a needs analysis and an intensive search for ways in which electricity use can be reduced.</p>

## BEGECA more than just a supplier

Successful Humanitarian Logistics starts with a professional procurement plan. BEGECA consults NGOs in the early planning phase of a project with selection of appropriate products, market analysis, logistical implications, definition of procedures, time schedules and a cost plan.

With the allocation from ECHO at hand, the NGO can instruct BEGECA directly (single bid) to start procurement activities. BEGECA ensures ECHO compliant procurement, liaises with the consignee and sends progress reports to the NGO. After completion of supplies, the NGO receives a Cargo Receipt Certificate and an invoice.

That's it. **Simple, cost efficient, straight forward and result oriented procurement. That is the mission of the HPC BEGECA.**

*With efficiency and expertise for human development*
